

List of Authorized Projects FY2021

Birmingham Metropolitan Planning Area

Prepared by the Regional Planning Commission of
Greater Birmingham (RPCGB)
Staff to the MPO

December 2021

Purpose of this Report

The federal metropolitan transportation planning statute states:

“In metropolitan planning areas, on an annual basis, no later than 90 calendar days following the end of the program year, the State, public transportation operator(s), and the MPO(s) shall cooperatively develop a listing of projects (including investments in pedestrian walkways and bicycle transportation facilities) for which funds under 23 U.S.C. or 49 U.S.C. Chapter 53 were obligated in the preceding program year.”

The Federal Highway Administration defines obligation as the federal government’s legal commitment (promise) to pay or reimburse states or other entities for the federal share of a project’s eligible costs. Thus, an obligated project is one that has been approved by the federal government for reimbursement, though not necessarily reimbursed yet. Obligated projects were not necessarily initiated or completed during this year. The obligated cost reflected in this report also may not equal final project cost. This report responds to the directive set forth in statute. It lists all federally-funded transportation projects in the Birmingham Metropolitan Planning Area (MPA) that were obligated (also referred to as "authorized") in federal fiscal year 2021 (October 1, 2020 to September 30, 2021).

Background

The Birmingham Metropolitan Planning Organization (MPO) is an association of 53 local governments in the Birmingham metro area, promotes a regional perspective towards the metropolitan area’s transportation issues and addresses those issues through cooperative local government action. The MPO boundary includes all of Jefferson and Shelby Counties and portions of Blount and St. Clair Counties (see map on following page). Federal transportation legislation requires, as a condition for spending federal highway or transit funds in urbanized areas, the designation of an MPO. The MPO has responsibility for planning, programming, and coordinating federal investments. The MPO process creates a partnership among state, local government, and transit operators in the region.

Transportation Improvement Program (TIP)

The Transportation Improvement Program (TIP) is a document which provides a list of projects to be initiated within a four year period. The TIP only includes projects for which funding has been identified using current available or anticipated revenues. The plan is developed by the Birmingham Metropolitan Planning Organization (MPO) in conjunction with local transit providers, jurisdictions, and agencies that are recognized as members of the MPO. The TIP is a direct subset of the 2045 Regional Transportation

Plan (for the rest of the document referenced as the RTP), which is the MPO's Long Range Transportation Plan. The TIP must be approved by the MPO, the Alabama Department of Transportation (ALDOT), and the Federal Highway Administration (FHWA). Once approved locally, the TIP is forwarded to the Alabama Department of Transportation where it becomes a part of the Statewide Transportation Improvement Program (STIP).

MPO Organization, History and Boundaries

A Metropolitan Planning Organization is an organization created to carry out the transportation planning activities in the MPA. Each urbanized area in the United States with a population of 50,000 or more is required by the Federal Highway Act of 1962 to establish a Metropolitan Planning Organization. The Birmingham MPO was established soon after in 1963.

The goal of the Federal Highway Act of 1962 is to ensure that the transportation planning process and resulting transportation network are cohesive and functional for urban areas that have grown together. In other words, transportation planning needs to be regional in scope because transportation systems cut across governmental boundaries. Urbanized Areas are designated decennially by the United States Census Bureau and are a reflection of urban growth based on population density, not political boundaries. For this reason, MPOs are responsible for the transportation planning process in Urbanized Areas and not single political entities.

On January 13, 1992, the boundaries of the Birmingham metropolitan planning area were expanded to include the geographic areas of Jefferson and Shelby Counties in accordance with the Clean Air Act Amendments of 1990 (CAAA). The boundaries did not change again until the data from the 2010 Census was analyzed. In 2012 the metropolitan planning area boundaries officially expanded to include portions of Blount and St. Clair Counties. These boundaries are based on the expected growth over the next 25 years and are formally reviewed by ALDOT and FHWA. The Birmingham Metropolitan Planning Organization (MPO) serves this planning area and is comprised of local government officials and representatives. Additionally, representatives from transportation authorities, such as the Birmingham - Jefferson County Transit Authority and the Alabama Department of Transportation, are included on this regional transportation policy board. They are joined by any member of the Blount, Jefferson, Shelby, or St. Clair County delegations serving on the legislature's Joint Highway Committee. There are currently forty-five voting members on the MPO.

FHWA and the Federal Transit Administration (FTA) have designated the Birmingham Urbanized Area as a Transportation Management Area (TMA). Federal Regulations (23 CFR 450.320) under the U.S. Department of Transportation require TMAs to develop and update a Congestion Management Process (CPM).
